Quadratic Word Problems - Practice Set A

1. A rectangle has length $(x + 3)$ metres and width x metres. Its area is 40 square metres. Form a quadratic equation and solve for x .
2. A ball is thrown upward. Its height in metres is $h = -5t^2 + 20t$. Find the times at which the ball is at height 15 metres.

3. The product of two consecutive positive integers is 132. Find the integers.
4. A farmer has 40 metres of fencing to enclose a rectangular pen against a wall. Find the dimensions that maximise the enclosed area.
